Turning 80? Come See Us at DMV!

Effective July 1, 2004, drivers age 80 or older are required to appear in person at DMV and pass a vision screening to renew their driver's licenses.

You may have your vision screened at DMV or present a report from an ophthalmologist or optometrist certifying that you've met the vision requirements to hold a Virginia driver's license. A doctor's report must have been issued within 90 days of your driver's license renewal.

Turning 80? Come See Us at DMV!

Driver's License Vision Requirements

With or without corrective lenses, a person's vision must be 20/40. If a person has vision problems in one eye, an individual must see 20/40 with the other eye, with or without corrective lenses.

Don't Let Your License Expire

If you allow your license to expire, you will be required to provide proof of legal presence to renew. Legal presence means that a person is either a United States citizen or is legally authorized to be in the U.S. Legal presence can be proved using an official U.S. birth certificate or a valid or expired U.S. passport. It can also be proved using a variety of other documents, such as a Certificate of Citizenship, Resident Alien Card or valid foreign passport with a VISA, I-94 or I-94W from a participating country.
